

Thank you for choosing Sunnydaze Decor. We stand behind our brand and the quality of the items we sell. Replacement parts or products will be sent at our discretion within the 1-year warranty period. Proof of purchase, with the date of purchase as well as photos of the merchandise defect must be provided. Photos are used to determine the cause of defects and for future quality control. If you have any questions, comments or concerns, feel free to contact us by phone at 888-881-4668, by email: customerservice@serenityhealth.com, or via our contact us page at www.SerenityHealth.com/contact-us/

SOLAR HANGING LED STARBURST LIGHT, 2-PACK INA-378

Please read this manual carefully before use and keep it for future reference.

HOW SOLAR LIGHTS WORK

During the day, the solar panel converts solar energy into electricity and stores it in the rechargeable battery. At night, the light turns on automatically via a light detecting sensor built into the unit. How long the light illuminates will depend upon the location of the light, weather conditions, and how much direct sunlight the unit is exposed to. Ensure the power is switched to 'ON' while charging.

CHOOSING THE RIGHT LOCATION

- Select an outdoor location where the solar panel will receive at least 6-8 hours of full, direct sunshine each day. Ensure the solar panel is not being shaded by tree, shrub or building shadows throughout the day as this will influence the charge of the battery and shorten the working time at night.
- Avoid locations with strong nighttime light sources nearby, such as street or porch lights, as it may cause the light to turn off due to the light detecting sensor receiving too much ambient light.

OPERATION

1. Carefully unpack your solar light from the box.
2. Switch the power button to the 'ON' position.
3. Hang the solar panel in your desired location.
4. Arrange the flexible light branches as desired.
5. First Time Use: The solar light will require at least 8 hours of full and direct sunlight to fully charge the battery. Make sure the unit is turned on while charging.
6. As long as the battery has a sufficient charge, the product will automatically illuminate when it gets dark, and turn off during the day.

REPLACING THE BATTERY

The battery, like all rechargeable batteries, has a limited life span, and become less efficient with repeated charge/discharge cycles. As the capacity of the battery reduces over time, you will notice reduced operating time and will need to replace the battery.

IMPORTANT: Only use compatible rechargeable batteries, alternatives may be incompatible which may damage the system and will void the warranty.

Dispose of the batteries in accordance with local laws and regulations.

ACCESSING AND CHANGING THE BATTERY

1. Switch the power OFF.
2. Carefully remove the screws on the bottom of the battery housing.
3. Gently remove the old battery.
4. Paying attention to the positive and negative terminals, gently insert the new battery.
5. Carefully reassemble the battery housing.
6. The solar light will require at least 8 hours of full, direct sunlight to fully charge the battery.

⚠ IMPORTANT INFORMATION ⚠

USE & CARE

- For outdoor use only.
- Keep the solar panel clean by wiping it down with a damp cloth. Clean solar panels will absorb more sunlight.
- Never use chemicals or abrasive materials to clean the unit.
- Do not allow the unit to freeze; store indoors during freezing weather.
- Remember to turn the unit off before storing. It is also recommended that the battery is removed from the unit while it is being stored.
- Only use compatible rechargeable batteries. Incompatible batteries may damage the product and will invalidate the warranty.

TROUBLESHOOTING

- Ensure the power button is turned to the 'ON' position.
- If the light only works for a short period of time, attempt a 'Boost Charge'.
 - Turn the power 'ON' and let it charge in full, direct sunlight for at least 8 hours.
 - Turn the power 'OFF' at night to conserve the battery.
 - Repeat this process for 2-3 days. If the unit still does not work, the battery may need replacing.
- This product was designed to only work at night, make sure the light sensors are not receiving too much ambient light.

This product uses a rechargeable battery. When the battery can no longer be used, it should be removed from the unit and recycled. The battery must not be incinerated or composted. Recycle the battery in accordance with local laws and regulations.

Any modification or failure to follow the recommended care will void the product warranty.
