

## CRACKLE GLASS JAR COLOR-CHANGING LED SOLAR LIGHT WITH SHEPHERD HOOK, 2-PACK INA-510

Please read this manual carefully before use and keep it for future reference.

### HOW SOLAR LIGHTS WORK

During the day, the solar panel converts solar energy into electricity and stores it in the rechargeable battery. At night, the light turns on automatically via a light detecting sensor built into the unit. How long the light illuminates will depend upon the location of the light, weather conditions, and how much direct sunlight the unit is exposed to.

Ensure the power is switched to 'ON' while charging.

### CHOOSING THE RIGHT LOCATION

- Select an outdoor location where the solar panel will receive at least 6-8 hours of full, direct sunshine each day. Ensure the solar panel is not being shaded by tree, shrub or building shadows throughout the day as this will influence the charge of the battery and shorten the working time at night.
- Avoid locations with strong nighttime light sources nearby, such as street or porch lights, as it may cause the light to turn off due to the light detecting sensor receiving too much ambient light.

### INSTALLATION

1. Remove the top from the glass jar and turn the power 'ON'.
2. Replace the top on the jar, ensuring the top will not fall off when it is hung.
3. Insert the shepherd hook into the ground, ensuring the soil is firm enough to support it.
4. Hang the glass jar on the shepherd hook.

### REPLACING THE BATTERY

The battery, like all rechargeable batteries, has a limited life span, and become less efficient with repeated charge/discharge cycles. As the capacity of the battery reduces over time, you will notice reduced operating time and will need to replace the battery with a compatible battery.

## ⚠ IMPORTANT INFORMATION ⚠

### USE & CARE

- Designed for outdoor use only.
- Keep the solar panel clean by wiping it down with a damp cloth. Clean solar panels will absorb more sunlight.
- Never use chemicals or abrasive materials to clean the unit.
- Do not allow light to freeze; store indoors during freezing weather. Remember to turn the unit off before storing.
- Only use compatible rechargeable batteries. Incompatible batteries may damage the product and will invalidate the warranty.

### TROUBLESHOOTING

- Ensure the power button is turned to the 'ON' position.
- If the light only works for a short period of time, attempt a 'Boost Charge'.
  - Turn the power 'ON' and let it charge in full, direct sunlight for at least 8 hours.
  - Turn the power 'OFF' at night to conserve the battery.
  - Repeat this process for 2-3 days. If the unit still does not work, the battery may need replacing.
- This product was designed to only work at night, make sure the light sensors are not receiving too much ambient light.

This product uses a rechargeable battery. When the battery can no longer be used, it should be removed from the unit and recycled. The battery must not be incinerated or composted. Recycle the battery in accordance with local laws and regulations.

**Any modification or failure to follow the recommended care will void the product warranty.**
