

# ROUND CAST IRON UMBRELLA BASE YUK-093

Read and follow all instructions before assembling and using this product. Save these instructions in a safe place for future reference.

**Assemble the umbrella base on a smooth, clean surface to avoid scratching or damaging the finish.**

## PARTS:

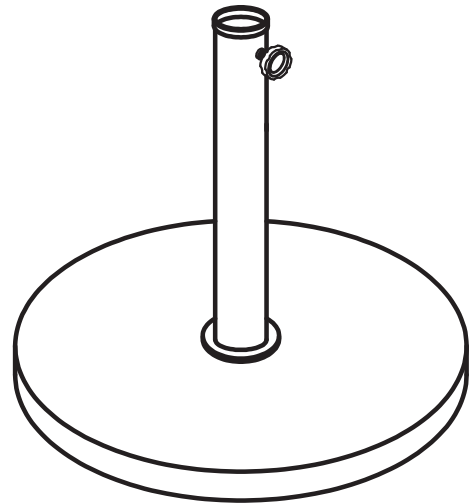

A	 Base (style may vary)	1
B	 Pole	1
C	 Adapter	1
D	 Threaded Knob	1
E	 Washer	1
F	 Bolt	1

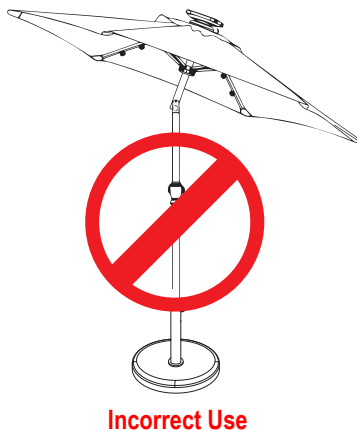

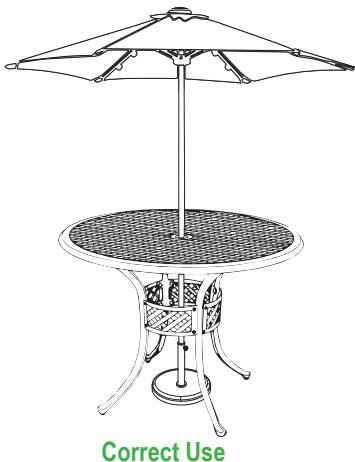

## ASSEMBLY

- ▶ Place Washer (E) onto Bolt (F) and insert through the bottom of Base (A).
- ▶ Attach Pole (B) onto Base (A).
- ▶ Screw Threaded Knob (D) into Pole (B).
- ▶ Adjust adapter (C) to fit your umbrella pole.

If the pole feels unstable, secure it more firmly by holding the pole and tightening the bolt with a wrench (not included). Do not over-tighten the bolt as it may strip the bolt and damage the product.

## ⚠ SAFETY STATEMENTS & MAINTENANCE ⚠

- This is not a freestanding umbrella base; the base must be used under a table designed to support an umbrella pole.
- Check for, and empty, standing water from the base.
- Do not stand on the base – it is only meant to support the weight of an umbrella.
- Store in a dry location when not in use – do not leave exposed to inclement weather.
- Clean with mild soap and water – use of harsh chemicals may damage the product and will invalidate the product warranty.
- Do not over-tighten the adjustable handle as it may damage your umbrella pole.
- Close patio umbrellas when not in use and remove umbrellas during high-wind conditions; the base is designed only to support an umbrella and will not protect your umbrella from wind damage.

**Any modification or failure to follow the recommended care will void the product warranty.**
